

Like a second pair of hands!

OUTFEED ROLLERS™

200 lbs.
CAPACITY

PATENTED

HDR-1000

Few operations are more difficult than wrestling a giant sheet of plywood or MDF (or any long piece of lumber) through a cabinet table saw... alone. If you're lucky enough to have a helper standing by to lend a hand, it's no problem. But more often than not, you're working alone.

In these cases, Outfeed Rollers™ deliver immediate improvements in safety and accuracy, especially when you're working by yourself. By providing support (at least 48" past the blade) – and the ability to support large panels and long boards – dangerous blade jams, binding and kickbacks are significantly reduced.

For use on most brands of cabinet saws including those with sliding tables. See diagram below left.

24" wide models for use w/ sliding table.

Outfeed Rollers™

Model	Size (width)	Description	Brand
HDR-1000	24"	90" Cabinet Saw	40
HDR-0800	24"	same as above w/ Sliding Table	40
HDR-1200	24"	52" - 14" with Cabinet	40
HDR-1000	24"	same as above w/ Sliding Table	40

Like a second pair of hands!

OUTFEED ROLLERS™

Operation and set-up is quick and easy with our Outfeed Rollers...

Lifts quickly into position and locks with a single motion. Just lift up on the outboard end of the rollers and the special folding Support Arm drops into position, ready to provide ample support for up to 200 lbs. No tools required. Extends your Saw Table a full 4' beyond the blade. Provides more than enough extra support to easily balance an 8' long panel after it's been ripped. Features a unique, two-position cam action to handle all types of cuts. Allows you to set the outfeed rollers so they're flush with your workpiece or your Miter Gauge (or future) Guide Bar. See drawings below for clarification.

Cam action keeps the roller table parallel with saw table at all times.

When the rollers are in the "up" position, they are in alignment with the surface of your saw table.

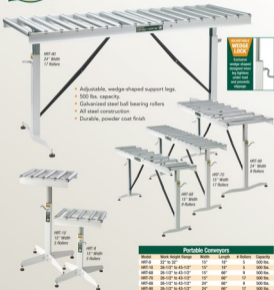

When the rollers are in the "down" position, they are 3/8" lower... and in alignment with the bottom edge of your miter gauge (or future) bar.

Folds down simply, with no tools for maximum space saving. First row of rollers provides support even in down position.

Make planing, ripping, jointing and production work easier.

PORTABLE CONVEYORS

ADJUSTABLE WEDGE LOCK
 Locking wedge-shaped support legs fit together to provide a secure, level base.

- Adjustable, wedge-shaped support legs.
- 500 lbs. capacity.
- Galvanized steel ball bearing rollers.
- All steel construction.
- Durable, powder coat finish.

Portable Conveyors

Model	Work Height Range	Width	Length	# Rollers	Capacity
HC1-6	22" to 32"	15"	58"	5	500 lbs.
HC1-10	26-1/2" to 43-1/2"	15"	58"	5	500 lbs.
HC1-6B	26-1/2" to 43-1/2"	15"	66"	6	500 lbs.
HC1-7B	26-1/2" to 43-1/2"	15"	66"	10	500 lbs.
HC1-8B	26-1/2" to 43-1/2"	20"	66"	6	500 lbs.
HC1-9B	26-1/2" to 43-1/2"	20"	66"	10	500 lbs.

Next time you need an extra hand, think HTC!

STOCK STANDS

- Adjustable, wedge-shaped support legs.
- Galvanized steel ball bearing rollers.
- All steel construction.
- Durable, powder coat finish.

Stock Stands

Model	Work Height Range	Roller	Capacity

"Breathable" Tool-Saver™ protects your investment

MACHINE COVERS

Protect your investment from performance threatening condensation and rust!

These versatile machine covers are the answer to condensation and rust, as well as harmful moisture, dust and other workshop elements. These unique covers are made of rugged cotton sheeting that's scientifically coated with a special plastool, which allows it to breathe, yet remain water-resistant. The fabric is then roll-hemmed around the entire perimeter with a rubberized magnet sewn into each corner.

TS-0112 on 10" sandblaster

TS-0112 on 10" cabinet size with 50" fence and saw guard

Excellent for:

- Tools
- Bikes
- Air Conditioners
- Tool Boxes
- Lawn Mowers
- Tractors
- Tillers
- Snow Blowers
- Barbecues
- Patio Furniture
- Fire Wood
- and much more...

Machine Covers Available in four sizes to fit a variety of items:

Model	Size	Description
TS-0038	Small (21" x 36")	Ideal for small handiwork "hobby" tools
TS-0058	Medium (30" x 50")	Use for Smitzbars, Sheet Metal Joints, Router Tables, Belt/Buffer Sanders, etc.
TS-0070	Large (54" x 70")	Best for Table Saws, Shapers, Lathe, Planers, Long Bed Joints, etc.
TS-0112	Jumbo (72" x 110")	Recommended for large Table Saws with Extensions and large commercial/industrial machinery of all types.
